Concordia College LUTHERAN CHURCH - CANADA MISSOURI SYNOD EDMONTON

DEDICATED

TO THE MEMORY OF PIONEERS OF THE LUTHERAN CHURCH IN CANADA, AMONG WHOM WERE THE FOLLOWING:

REV. RASMUS JENSEN, first Lutheran pastor in Canada (also North America), who accompanied the Jens Munck expedition to Churchill, Manitoba, 1619-20.

JOHANN JORPEL, a teacher who conducted the first Lutheran confirmation in Canada, at Halifax, 1761.

REV. FREDERICK SCHULTZ, first resident Lutheran pastor in Canada, at Lunenburg, Nova Scotia, 1772-82.

REV. SAMUEL SCHWERTFEGER, first Lutheran pastor in Upper Canada, serving from about 1789 until his death in 1803.

REV. JOHN H. BERNHEIM, "the apostle to the Lutheran settlers in Upper Canada," in 1835-36.

REV. JOHANN ERNST, a charter member of the Missouri Synod, known as the "Father of the Ontario District," who accepted a call to Floradale, Ontario, in 1863.

REV. H. BUGEL, first resident pastor of the Missouri Synod in Western Canada, who began work in Winnipeg in 1891.

REV. EMIL E. EBERHARDT, first resident pastor of the Missouri Synod in Canada west of Manitoba, who began work at Stony Plain, Alberta, in 1894.

DR. ERNST NEUDOERFFER, the first Lutheran missionary from Canada, who went to India in 1900.

SISTER MARIE GERNDT, the first Canadian-born Lutheran deaconess, who was consecrated in 1902 and served until 1942.

This yearbook is also dedicated to

DR. ALBERT H. SCHWERMANN, president of Concordia College, Edmonton, from its founding in 1921 until 1954.

PRESIDENT'S REPORT

This yearbook, I trust, will help us all to pause and to ponder where we are in life, and where we are going as well. The past year is only a single piece in a large jig-saw puzzle. It is meaningful only to the degree that it fits into some larger pattern.

In this regard the Scriptures give us an important clue when they remind us that "man does not live by bread alone." Far beyond this low-level ambition is a task that overarches and pervades all that we do. We live and work to glorify God. To live in His service whether in the office or shop or parish, whether in the home or school or government- this is the goal that can give abiding meaning to the many and various occupations of man.

We are God's by virtue of our creation and redemption. He placed us in this blessed land, and He gave us a mission to perform. To offer Him our industry and skills, our love and loyalty in all the daily tasks that confront us - this gives meaning to our labors.

In this centennial year, when many Canadian citizens will celebrate just for the sake of celebrating, it is important that we and they continue the quest for meaning. May this centennial year move us to gratitude and to rededication to Him from whom all blessings flow and who gives lasting meaning to our lives here and hereafter.

Sincerely.

FACULTY RETREAT

SEPTEMBER 4-7, 1966

The Concordia College Faculty retreated to Jasper Park before the flood of new students and returning students came about.

The Faculty planned their strategy carefully,

outlining all forms of battle for their

annual fight against the STUDENTS.

Top secret meetings were held which resulted in various committees being selected to infiltrate

the ranks of the

students and EXERT

their influence upon the

student body.

BUT-it appears as though they had a pretty good time as

it was.

They actually got up
early
in the morning and even
went hiking and mountain climbing
(sort of)

P.S. Seems as though Miss Schwermann and Prof. Borger went canoeing and ,

they capsized and got all WET!!!

DO YOU SAIL FROM HERE?

How does your compass read — what is your next port-of-call? Are your horizons near or far? Time will tell of the number who achieve their goals. Will you be one of these? Some will drift aimlessly on the uncertain sea of life. Others will be storm-tossed on unseen rocks and shoals. But those who prepare well and maintain their charted courses with courage and faith — these are most likely to sail into happy harbors. The members of AAL wish for all of you a pleasant and rewarding journey.

AID ASSOCIATION FOR LUTHERANS . APPLETON, WISCONSIN

FATHERS OF CONFEDERATION – The meeting of the Fathers of Confederation at Quebec in 1864 led to the union of the provinces in Confederation in 1867.

Macdonald acted as conference chairman and, on July 1, 1867, when the British North America Act uniting the provinces went into operation, he became the first prime minister of the Dominion of Canada.

On March 31, 1949, Newfoundland became the tenth province to enter Confederation, thus completing the unification of Canada from "sea to sea" as envisioned by the Fathers of Confederation back in 1867.

SIR JOHN A. MACDONALD

A. MacKENZIE

On July 22, 1793 – Alexander MacKenzie successfully reached the Pacific by land. Commemorating the event at Dean Channel, MacKenzie inscribed the above message upon a large flat rock. At mouth of Bella Coola River in British Columbia, the rock has been found and the inscription restored.

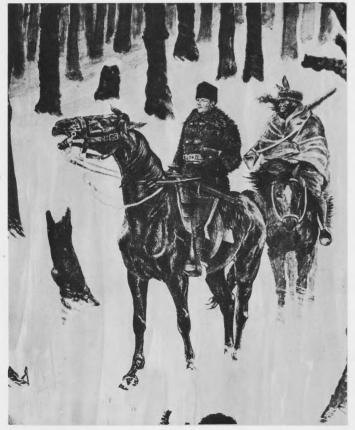

LOUIS RIEL

Hero. Martyr. Rebel. He secured the entry of Manitoba into Confederation as a province rather than as a territory.

ALEXANDER GRAHAM BELL Dr. Alexander Graham Bell – Invented the principal of the telephone in 1874. First working model came two years later.

NORTH WEST MOUNTED POLICE

1873 — Sir George Arthur French was the first commissioner of the North West Mounted Police. At the outset it consisted of 3 divisions with a total number of 150 men. Primary area patrolled at that time was the Fort McLeod area, a little north west of the present site of Lethbridge, Alberta.

The original music was composed by Calixa Lavallee in 1880. The official English words were created by Dr. Stanley Weir in 1908.

SHINPLASTER

Due to a shortage of silver coins and because paper money could be printed quickly, the government issued 25 cent notes in the year 1870. They were popularly called shinplasters.

DRIVING OF LAST SPIKE

Donald Smith, in November 1885, at Carigellachie, B.C., drove the spike joining the east and west sections of the trans-continental railway. Construction began in 1881.

made on Rabbit Creek in the Klondike on August 17, 1896. The discoverer was George W. Carmack. A few days after the discovery,

Rabbit Creek became known by the more dramatic name of Bonanza.

Gold had been found many years before the great strike but in small deposits. The Carmack discovery precipi-tated the famous gold rush which hit its peak in the spring of 1898. It is estimated that 100,000 persons actually set out for Dawson City.

1770-1857: DAVID THOMP-SON in May, 1807 accompa-nied by his wife and family, crossed the Rockies by what is now known as Howse Pass. He was the first white man to travel the full length of the Columbia River.

GUGLIELMO MARCONI: He sent the first wireless message, a distance of one mile in 1895. He received the first trans-Atlantic wireless message at St. John's, Nfld. in 1901.

ROALD AMUNDSEN, in the schooner Gjoa, arrived at Nome, Alaska, the first completed traverse of the North-West Passage. He is also credited with laying down the exact location of the north magnetic pole.

EXPLORER - THOMPSON

MARCONI

SIR WILFRID LAURIER -Leader of the Canadian Liberal Party, 1887-1919; prime min-ister of Canada, 1896-1911. Laurier devoted his life to furthering the cause of Canadian unity.

QUEBEC BRIDGE, A HISTORY OF DISASTER - The now famous bridge was started in 1900, collapsed on August 29, 1907 killing seventy-five workmen. Reconstructed in 1913, the bridge collapsed again on September 11, 1916 killing 13 more people. The bridge was finally constructed in 1917 and has remained standing since. The bridge was constructed to link Quebec City with the trade and commerce of the south shore on the St. Lawrence.

FIRST WORLD WAR 1914-1918: On October 16, First Canadian Contingent of over 33,000 troops landed at Plymouth, England. More than four hundred thousand Canadians "proceeded overseas" to make the world safe for democracy. Fifty thousand soldiers died.

DR. FREDERICK BANTING along with his lab assistant Dr. Charles Best discovered insulin in November, 1921 for the treatment of diabetes.

WORLD WAR II - 1939-1945: In World War II a total of 1,086,771 Canadians were in uniform. It was going to be a short war; that was the feeling, it lasted six long years.

THE TRANS-CANADA HIGH-WAY stretches 5,160 miles joining Nova Scotia to British Columbia. Construction: 1949-1962. Cost: \$625 million dollars.

WORLD WAR I hastened airplane development. Today, Canadian air carriers transport more than 5.5 million passengers a year.

CANADA'S NEW FLAG was introduced on December 15th, 1964 by the Rt. Hon. Lester B. Pearson. Officially became Canada's flag on Feb. 15th, 1965.

PLACE VILLE MARIE, Centennial concert halls, hundreds of private, high rise apartment buildings. Today a new wave of growth is making its mark across the nation.

COLLEGE
Advanced methods in education plus thousands upon thousands of students, are today the foundation for Canada's next one hundred years.

BLACK BRANT ROCKETS launched from the rocket range at Churchill, Manitoba measure the characteristics of the upper atmosphere.

AERIAL VIEW OF EXPO

Canada marks one hundred years of progress with Expo on Ste Helene's Island in the St. Lawrence River at Montreal.

Can you imagine for one moment this great country of ours in the year 2067? That's one-hundred years from now and if the acceleration of our growth was to maintain the same pace, Canada would still be one of the leading nations of the world — if not the leader.

But to sit and contemplate and try to forecast the future is not how this country was built, and crystal-ball gazing has never been a set formula for success. It is the wisdom, courage and action of great men like Sir John A. Macdonald, Laurier, Borden and others that has helped to make this country what it is today.

So how can we as individuals, even dare, to think about or even voice opinions on how this country will look to the eyes of the world in the next one-hundred years.

Impossible? Not really. Perhaps to look back in order to look ahead is the answer. That great span of time from 1867 to 1967 has served us well, and the accomplishments of the Canadian people have constantly multiplied over the years.

For example. From a small beginning back in 1750 a primary textile industry was established in Quebec. Today, the textile and clothing industry in Canada has a work force of 185,000 workers and the annual production in Quebec alone totals about \$700 million.

In 1803, the first Canadian paper mill established near Lachute, Quebec produced paper from rags, and forty-one years later, Charles Fenetry, lumberman's son of Sackville, N.S., revealed details of his discovery of how to make paper from ground pulp. This was the start of the pulp and paper industry, which today generates one dollar in eight of incomes of all Canadians. Newsprint paper is now a leading Canadian export commodity.

Canada's first motor vehicle is believed to have been an electric car built in 1893 by the Dixon Carriage Works in Toronto. In 1965 Canadian automobile assembly lines produced 710,711 cars and 144,765 commercial vehicles. At the end of 1965 the total number of vehicles in use was almost 6,725,400. In 1882 the first practical use of electricity was put into operation in a Quebec textile mill who generated its own power. Ever since, Hydro growth has continued to rise with a total output of electrical energy at a staggering

42 billion kilowatts in 1946, 134 billion in 1964 and 143 billion in 1965. Canada's first nuclear power station, a 20,000 kilowatt experimental plant at Rolphton, Ontario, opened in 1962.

In the area of transportation, Canada's first road was a tenmile, log-surfaced stretch built by Champlain in 1606. To date, the country has more than 430,000 miles of highways, including the famous Trans-Canada Highway which stretches a total of 5,160 miles and was built at a cost of \$625 million.

The first flight in Canada of a heavier-than-air machine under its own power (McCurdy's Silver Dart) took place in 1909. Today there are over 5,000 licensed aircraft, more than half of them private planes. Canadian air carriers transport more than 5.5 million passengers a year.

Back in 1867, the population of Canada was 3,689,000 with a total of 80,300 students and some 13,559 teachers in our schools. It is predicted that the student population will be 4,000,000 with 189,705 teachers out of a total population of 19,500,000 in 1967.

In late 1965 the Bladen commission, appointed by the Association of Universities and Colleges of Canada, forecasted total expenditures of universities would rise from \$429 million in 1963-64 to \$1.3 billion in 1970-71 and to \$2.0 billion in 1975-76; the commission also forecasted that enrolment would rise from 201,000 in 1965-66 to 461,000 in 1975-76, or from less than seven per cent of the 18-24 years age group to about 16 per cent.

Fact upon fact, figure upon figure, there are enough to fill a million pages and more and all of them relating to progress. Canada is still a very young country with fresh ideas and the most important quality that is synonymous with the young — AND THAT IS VITALITY.

Where does Canada go from here? For a start, during its Centennial year the country will be host to some 70 countries from April 28 to October 27 during the Expo '67 World Fair to be held in Montreal; host to over 33 different countries during the Fifth Pan-American Games to be held from July 22nd to August 7th, in Winnipeg. Aren't you proud to be a Canadian?

REPRESENTATIVE

Many years before Confederation, traders and adventurers of the Hudson's Bay Company helped to shape the history of Canada through exploration and settlement. Since the establishment of the Bay's first department stores at Winnipeg in 1881 and Edmonton in 1890 the Bay has progressed with the country. Today, 100 years after Confederation, the Bay still serves Canadians in its continuing tradition of quality. Your satisfaction is assured when you shop at the Bay.

EDITOR'S MESSAGE

Each school year provides many enjoyable experiences. I hope that this yearbook will help to re-create some of those moments of which you are fondest. Let the '67 CORONA BOREALIS be an aid to your memory.

Many of us will be leaving this school, never to return again as students; but I hope that this book will go along to help all of us remember this special year. I know that I'll miss all of you but I'll have this yearbook with which to remember you. The CORONA BOREALIS '67 is a special book, full of new things, and I hope a worthy token of Concordia's part in Canada's Centennial.

To those who come back to Concordia, let me say that with this book you can show new students what life here is like and how we live together in a Christian atmosphere. This school is you; keep it the wonderful place that it is.

I would like to give special thanks to Coach Buck who helped a great deal in developing pictures. Thank you also, Diane Hayes, for the part you did in managing our business affairs. To the rest of the crew, also, thanks for your help.

But thanks most of all to the students of Concordia College who provided the necessary material for this yearbook---yourselves.

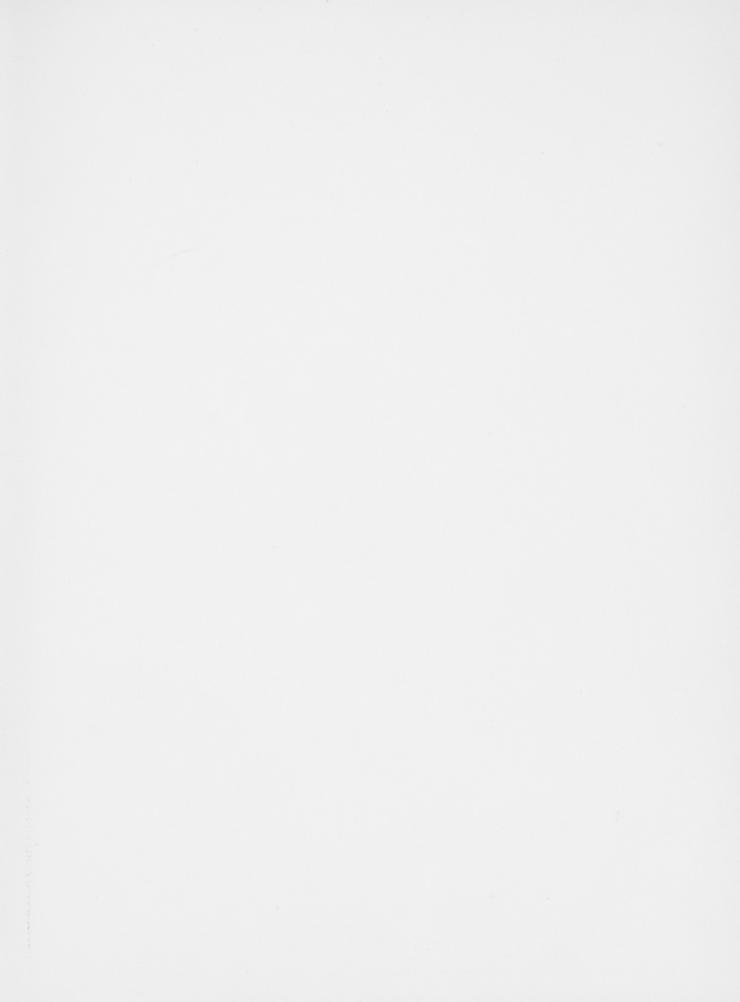

> Thank you and God bless you in all your future endeavors.
